

gorgeous prizes

WIN A MUST - **SPAPLIANCE** HAVE **SPAPLIANCE ORB** WORTH £175

The recently launched ORB from **SPAPLIANCE** is taking the beauty industry by storm! This gorgeous, state-of-the-art device not only looks fantastic in any treatment room with its softly glowing 'docking station', but it also transforms any treatment into something really extra-special for your clients.

The ORB works by warming any oil-based skincare, serum or mud to the perfect temperature for application and then it keeps it at this constant temperature for up to an hour (away from the docking station). It has indicator lights to let you know when it's reached the perfect temperature and then, after an hour, the light will let you know it's time to re-dock and reheat - it's so easy!

Your clients will love the wonderfully relaxing, luxurious feel of the warm product being gently painted onto their skin, all their stress just melting away...

The good news is that the ORB is suitable for most treatments offered in spas and salons, making it easy for you to offer the warm ORB technology as an 'extra' to customers. The ORB makes manicures magnificent, pedicures perfect, facials fabulous and massages truly marvellous and, best of all, you can upgrade your treatment menu without having to change your skincare ranges, the ORB works with what you already have.

It's no longer necessary to warm skincare products in hot towel cabinets or on radiators! The ORB makes your job much easier and your treatments even more amazing.

The ORB is available in two colours - warm white or melting mocha. Upgrade to warm ORB technology and see your business grow!
